

Introduction

EASY Timed Math Drills — DIVISION was developed especially for students who are having difficulty with basic math concepts. Students will gain confidence, speed, and accuracy as they progress through these step-by-step exercises. The drills start with whole page single divisor calculations and progress to calculations with two different divisors, then 3 different divisors, and finally to all-inclusive mixed divisors drills.

Set an appropriate time limit for each drill based on your student's ability levels. The amount of time allocated can be adjusted as skill levels develop. A chart is included on which each student's progress can be recorded. To validate a student's achievement, we have also included an award certificate.
