INTRODUCTION

Timed Math Drills — Multiplication provides step-by-step drills in multiplication that start with whole-page calculations using the same single factor (1 through 9), progress to calculations using two different factors, and then moves to all-inclusive mixed factors.

The goal is to achieve mastery at the highest possible accuracy level in the lowest possible time. Determine the time given to complete the drill based on students' ability levels. A chart is included on which each student's progress can be recorded. For those students who exhibit low accuracy scores or slow completion, repeated attempts at working the troublesome pages is recommended. Those students who do well initially might enjoy the challenge of repeating the drills in order to achieve "personal best" times. Award certificates are included to validate students' achievements.
